Key Experiences

Front-end Developer • **eKaizen Digital** Jul. 2023 — Nov. 2023

- I developed screens using Angular, TypeScript, HTML, and SCSS based on client requirements.
- Responded to bug-fixing calls when needed
- Designed screens using Figma, incorporating the company's identity into its products and aiming for an excellent user experience

Full-stack Developer • **2Clix** Jul. 2022 — Mar. 2023

- Part of my responsibilities involved developing new screens for our core tool, which assessed our clients' customer service. This was done using Javascript, jQuery, C#, SQL, and tools like Azure for managing tickets
- Besides the tasks for building new screens, there were also requests for bug fixes
- We utilized agile methodologies such as Scrum and Daily Scrum to encourage collaboration and mutual support

Development Internship • **Intrum** Nov. 2020 — Jun. 2022

- I was part of the development team, using tools like Angular, C#, SQL, Git, and Agile methodologies.
- Much of my tasks involved developing new tools to streamline data collection within the database, enabling individuals without direct access to easily visualize this information
- Additionally, I was responsible for a significant portion of bug fixes and user management within our primary platform

Educação e Principais Certificações

Analysis and Systems Development • **UNINTER**

2021 — Expected Graduation: Dec/2023

Analysis and Systems Development • **CEUNSP**

2019 — 2020 (Not Completed)

IT Technician • **FIEC**

2017 — 2018

Online Course: Accessible Web Applications • **Alura** 2023

Enhance Your Experience with TypeScript • **Alura** 2022

Online Course: Angular Complete Course • **Udemy** 2022
